Independent international consultant and teacher-trainer working for an education that promotes autonomous, happy and successful children.

Children and tadpoles

"Letting the children live today completely as such, tomorrow they will be adults in their full potential.

The tadpole does not make better toad if it is forced to live out of the water prematurely.

Thus also, the child does not develop better human qualities if his natural impulses are repressed, if he is forced to behave as a little adult...."

José Ortega y Gasset
